## **DECLARATION**

We hereby declare that the project work titled, "**CricInfo**," submitted as part of Bachelor' s degree in CSE, at Chitkara University, Himachal Pradesh, is an authentic record of our own work carried out under the supervision of Dr. Abhishek Thakur.

Signature(s):

# ACKNOWLEDGEMENT

We would like to express our deepest appreciation to our project supervisor, Dr. Abhishek Thakur, for his guidance, support, and expertise throughout the development of our music player. We are grateful for his invaluable insights and feedback that helped us refine our ideas and make critical decisions.

We would also like to thank our team members, Madhav Goyal, Akhilesh Thakur, Akshita and Anjori, for their hard work and dedication in bringing this project to fruition. Each team member brought unique skills and perspectives to the project, and their collaboration was essential to the success of the music player.

We extend our gratitude to the outside consultants who generously shared their expertise with us. Their insights and feedback helped us refine the functionality and usability of our music player. We would like to express our gratitude towards our parents member of CSE Department for their kind co-operation and encouragement which helps us in the completion of the project.

Lastly, we thank all of the users who provided valuable feedback that helped us improve the music player. We are proud of what we have accomplished and we hope that our music player will bring joy and entertainment to music lovers everywhere.

## **Project Title: CricInfo**

**Introduction:** Welcome to our cricket website, where we aim to provide you with all the latest news, updates and insights on the world of cricket. Here, you can find information on the history of cricket, the top cricketers of all time, and the latest scores and results from matches around the world.

Whether you're a die-hard fan or a casual observer, our website has something for everyone. We cover everything from the early days of cricket to the modern game, with a particular focus on the players who have made the sport what it is today.

**Project Category:** This project belongs to the general knowledge of the cricketers and also about sports/entertainment.

**Abstract:** The cricket players information website is a comprehensive platform that provides detailed information about cricketers from around the world. The website features a vast database of cricketers, including their biographical information, career statistics, records, and achievements. Users can search for their favorite cricketers, learn about their career highlights, and keep track of their current performances.

With its user-friendly interface and wealth of information, the cricket players information website serves as a one-stop destination for all cricket enthusiasts.

## **Work Done:**

**Overview:** The cricket website containing information of the cricketers is a valuable resource for anyone interested in cricket. It provides a comprehensive overview of the sport and its players, making it an essential tool for those who want to stay informed and up-to-date on the latest developments in the cricketing world.

### **Purpose:**

1. To give the people information about cricketers .
2. To get the Best playing IX of International Teams.
3. Make easy to get information.

## **Overall Description:**

- **Product Perspective:**

This software system is user friendly. The project has various pages of cricketers like doemstic, international ,etc.

- **Product Function:**

The function is to provide a comprehensive platform for users to access information about cricket players from around the world.

### 3. Operating Environment:

This project works on the following:

1. Operating System — Windows 10.
2. Text-Editor: VS Code.
3. Technologies used: HTML, CSS

### 4. Design and Implementation constraints:

- Platform Compatibility
- Resource Limitations

## **External Interface Requirements:**

- User Interface:
  - It will be easy to use and user friendly.
  - The user can easily get the information.

### 2. Software Interface:

This whole project works on browsers like chrome, firefox etc. and is based on the technologies like HTML, CSS.

## **Other Non-Functional Requirements:**

- Performance Requirements  
It gives quick responses. It is time saving.
- Portability Requirements  
User can use it from anywhere.
- Availability Requirements  
This system is up and running whenever needed.
- Scalability Requirements  
It meets the needs for which it was build.
- Security Requirements  
This system provides basic security authentication
- Safety Requirements  
It keeps the records. Also, it is safe from various attacks.
- Usability Requirements  
The user will be able to get information and improve his/her general knowledge.

- **Reliability Requirements**

It is available to the user all the time.

- **Supportability Requirements**

It is supported by all the browsers like chrome, firefox etc.

- **Efficiency Requirements**

It works with good efficiency

## CONCLUSION AND FUTURE SCOPE

CONCLUSION: This application will be very beneficial to people especially music lover's.

### FUTURE SCOPE:

The future scope of a cricket information website can include various features and functionalities to enhance the user experience and engagement. Here are some potential ideas for the future scope of a cricket information website:

1. Live scores and commentary: One of the most important features of a cricket website is live scores and commentary. This can be improved by integrating real-time data feeds and providing ball-by-ball commentary to keep users engaged.
2. Player and team profiles: Detailed player and team profiles with statistics, performance graphs, and other relevant information can help users better understand their favorite players and teams.
3. Fantasy cricket: Adding a fantasy cricket feature can allow users to create their own virtual teams, compete with others, and win prizes based on the actual performance of players in real matches.
4. Social media integration: Integrating social media channels such as Twitter, Instagram, and Facebook can allow users to engage with the website and share their thoughts and opinions.
5. Predictive analytics: Advanced analytics can be used to provide insights and predictions on player performance, team strategies, and match outcomes.

6. Video highlights: Providing video highlights of key moments in matches can enhance the user experience and keep users engaged.
7. Customization and personalization: Customizing the user interface, language, and content based on user preferences can improve the overall user experience and increase engagement.
8. Mobile app: Developing a mobile app can provide users with easier access to the website's features and functionalities, making it more convenient and user-friendly.

Overall, there are many opportunities for a cricket information website to expand its scope and add new features to attract and retain users. By continuously improving and innovating, a cricket information website can become a go-to destination for cricket fans around the world.
